ABOUT COMPANY

We produce

Electric torque wrenches

20 standard models
straight and angular versions
torque range up to 13 000 Nm

Pneumatic torque wrenches

20 standard models
straight and angular versions
torque range up to 13 000 Nm

Battery torque wrenches

14 standard models
straight and angular versions
torque range up to 8 000 Nm

Hydraulic square drive wrenches

7 standard models
torque range up to 40 000 Nm

Hydraulic low profile wrenches

4 standard models
torque range up to 30 000 Nm

Mechanical multipliers

3 standard models
torque range up to 10 500 Nm

ABOUT COMPANY

Our services

**Specialized service department
for tools with adjustable torque**

**Bolted connections tightening
and loosening services by a
team of OSSA technicians**

**Calibration of tools with adjustable
torque with torque range up to
40,000 Nm**

of equipment for commercial
services of bolted connections**

ABOUT COMPANY

Projects in Poland selected

National Stadium in Poland
the entire load-bearing structure of the
stadium was erected with use of
equipment from OSSA

LOTOS Group, plc.
participation in Program 10+
construction of hydrocracking system

ABOUT COMPANY

Projects in Poland selected

A photograph showing the interior of a large industrial facility, likely a steel mill. The scene is filled with complex machinery, including conveyor belts, structural beams, and large cylindrical components. The lighting is industrial, with bright spots from overhead lights and a warm, orange glow from a large furnace or molten metal area in the lower right.

ArcelorMittal Poland, AMP, plc.
works on blast furnaces
and construction of the new rolling
plant for steel plates at AMP Cracow

A wide-angle, high-angle photograph of a large, modern stadium. The stadium is filled with blue seats, and the pitch is visible in the center. The roof structure is a complex, white, curved design. The surrounding area includes some greenery and a few buildings.

Project Silesian Stadium in Chorzów
contract for tightening of bolted
connections of roofing segments
of 1st and 2nd tier
